Product Overview

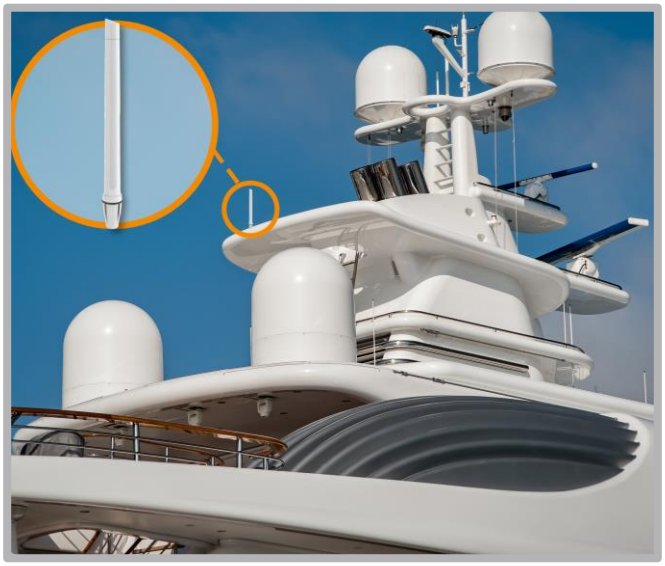

The OMNI-414 is an ultra-wideband antenna, which covers all contemporary LTE/5G frequency bands with excellent balanced gain across all frequencies from 617 to 3800 MHz. The antenna also offers 4x4 MIMO capability from its vertically separated radiating elements, all in the same single radome. The antenna design allows for superior pattern control over the entire frequency range, making the OMNI-414 a true omni-directional 4x4 MIMO antenna, suitable for marine and coastal applications. The antenna also comes with an IP68 protection rating against dust and water ingress, making it ideal for most severe storms at sea. The radome is also fully salt water protected so that it can be used in highly corrosive environments, thanks to the UV stable ASA radome material. The OMNI-414 guarantees signal reception almost everywhere and is usable in all part of the world. The ultra-wideband performance makes the antenna future proof, as it covers LTE Band 71 (617 to 698 MHz) as well as the CBRS bands from 3400 to 3800 MHz for inland use.

Antenna Performance Plots

VSWR: Cell 1

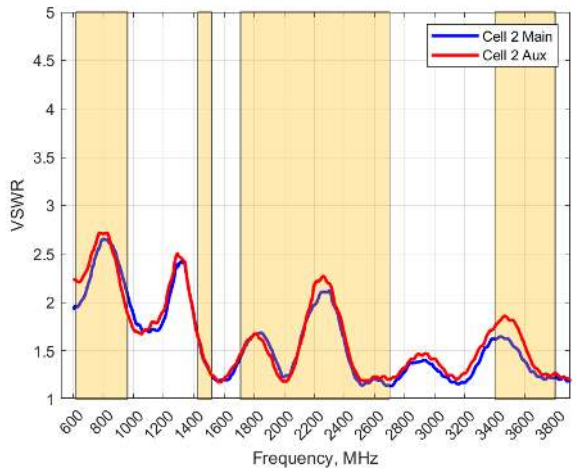

Voltage Standing Wave Ratio (VSWR)*

VSWR is a measure of how efficiently radio-frequency power is transmitted from a power source, through a transmission line, into a load. In an ideal system, 100% of the energy is transmitted which corresponds to a VSWR of 1:1.

The OMNI-414 delivers superior performance across all bands with a VSWR of 2:1 or better across 90% of the bands.

**VSWR measured with a 2m low loss cable*

VSWR: Cell 2

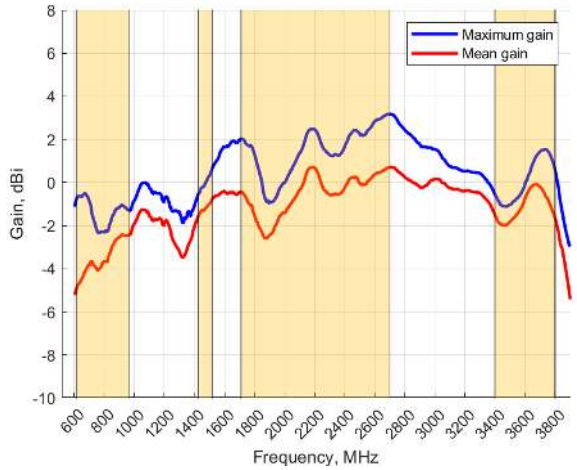

Voltage Standing Wave Ratio (VSWR)*

VSWR is a measure of how efficiently radio-frequency power is transmitted from a power source, through a transmission line, into a load. In an ideal system, 100% of the energy is transmitted which corresponds to a VSWR of 1:1.

The OMNI-414 delivers superior performance across all bands with a VSWR of 2:1 or better across 90% of the bands.

ISOLATION

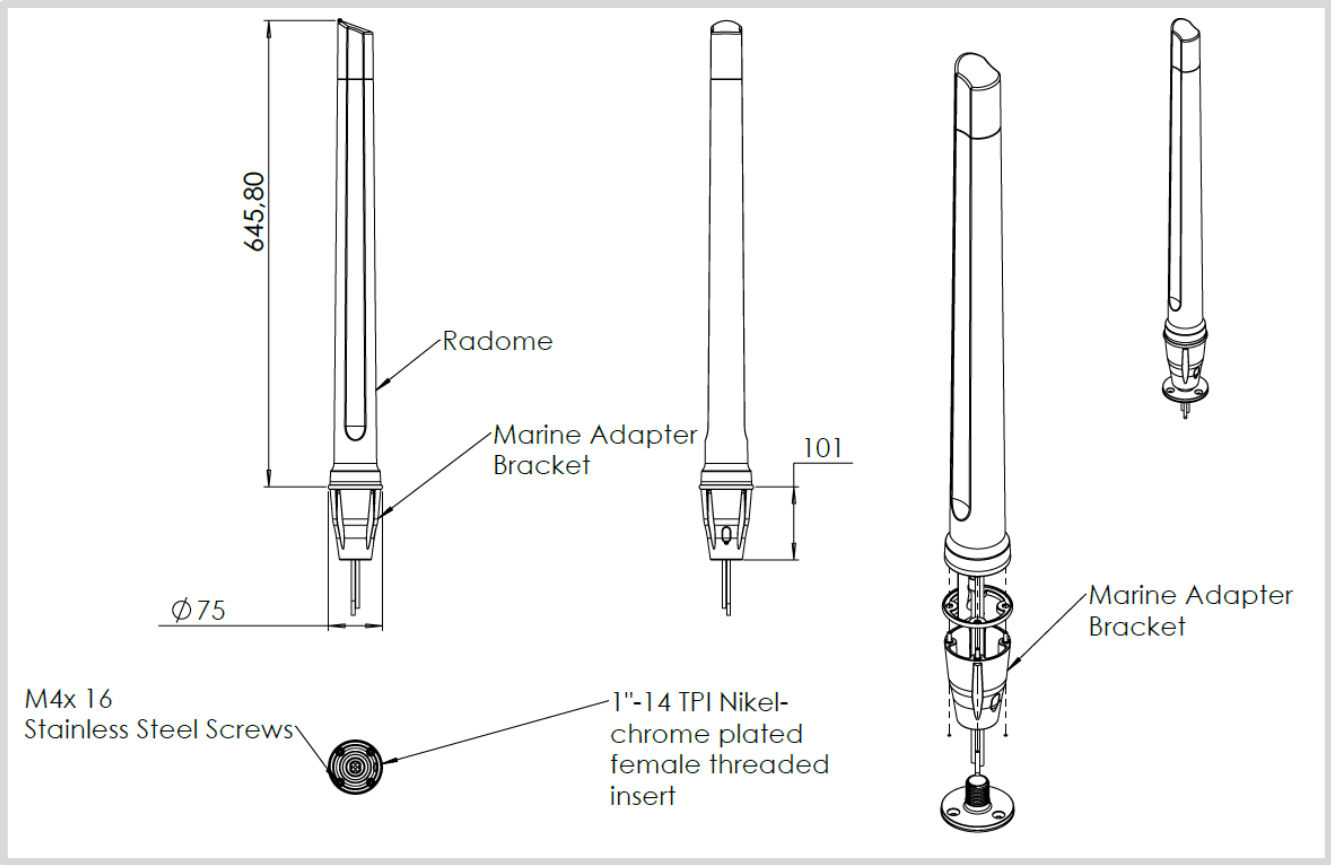

Isolation

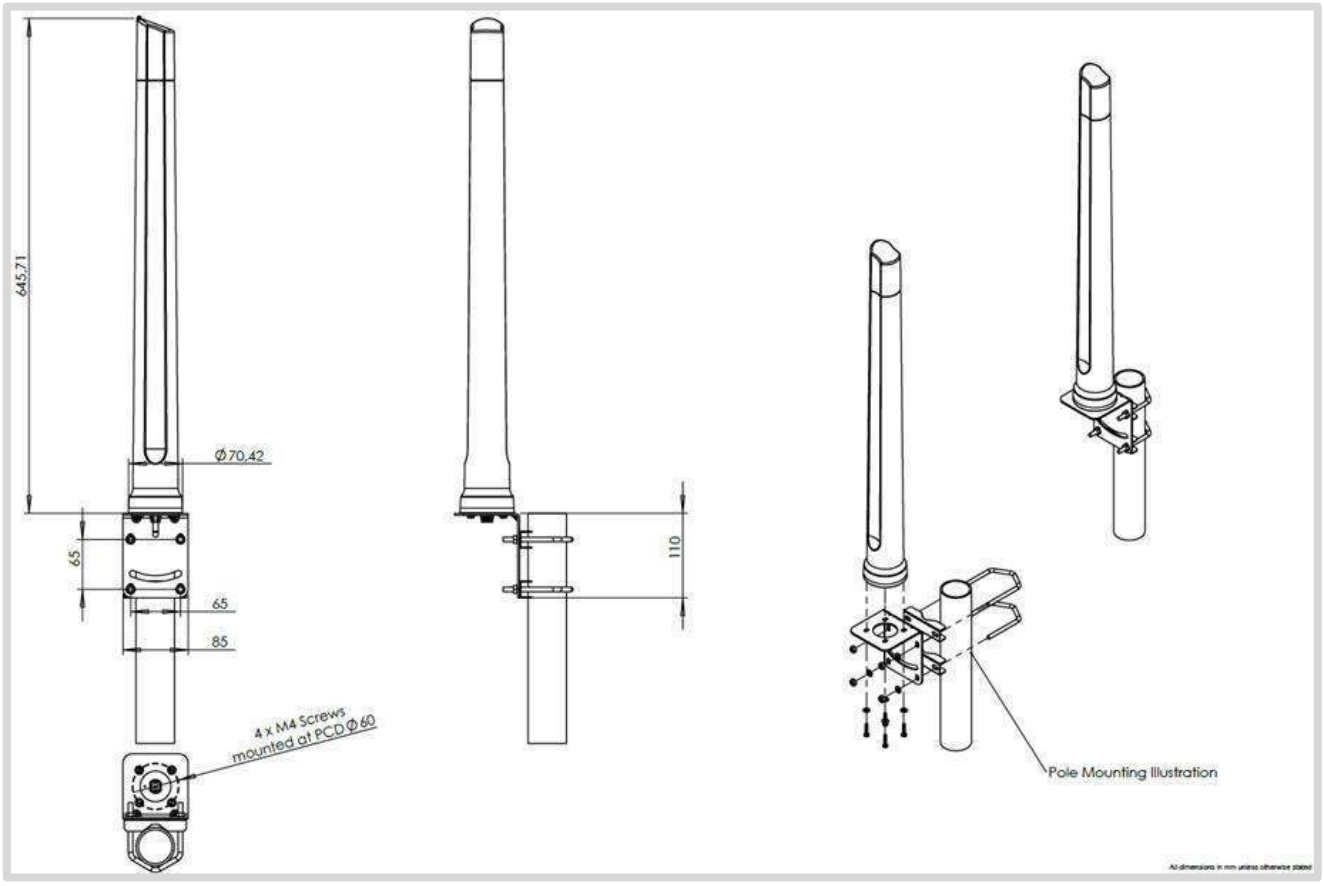

Isolation is a measure of the amount of energy leaked from one port to another. In an ideal case no energy should leak from port one to port another.
